DETAILED ACTION

This Office Action is in response to the amendment filed 22 July 2005.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 and 7-8 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,3-4 and 6-9 of copending Application No. 10/722446. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are broader than the claims of 10/722446 in regards to the limitation of the base, where the base in the present application is a dependent claim and can just be added into the independent claim.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 2822

Claims 9-10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,3-4 and 6-9 of copending Application No. 10/722446. Although the conflicting claims are not identical, they are not patentably distinct from each other because even though application 10/697247 does not disclose the terminals to be either solder balls or lands it is well known in the art that terminals can be solder balls or lands.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
